Lego®-based Therapy Weekly Sessions

For primary aged children on the
autistic spectrum

1st September to 13th October, 2022

Our Program

Creatovators are running a course of 7 weekly sessions.

LEGO®-based Therapy is a fun way of helping children on the autistic spectrum learn social skills. By working in small teams with support, the children learn to take on roles, take turns, listen, talk, problem solve and cooperate better.

Using LEGO®, participants are encouraged and supported to work in teams of 2 or 3 to build kits, then models of their own design, together.

Please note these are structured sessions which help promote the children's social skills, not just a club.

Dates: Thursdays, 1st September to 13th October 2022

Times: 4.45pm to 5.45pm

Venue: Bearsden Baptist Church, 14 Roman Road,
Bearsden, G61 2SL

Cost: £224.00 per child

How to book

To secure a place please pay a non-returnable deposit of £50 by cheque, cash or BACs (For bank details email info@creatovators.com). Places are subject to our Terms and Conditions which can be found at www.creatovators.com where you can also find our privacy policy.

Please note, we will be working to improve the social skills of participants and recommend that all sessions are attended. However, we recognise this may not be possible.

Enroll today

Use the Booking Form or for further details please contact June Grindley or Jacqueline Patrick.
